# Project Theme : Health Care

15<sup>th</sup> December 2020

## **PROJECT NAME : ALLEVIATE AID ADVISORY**

### **PROJECT DETAILS :**

- A portal which is helpful for users to predict their diseases by taking their symptoms.
- We also provide cure and medications for the disease.
- We also provide an option for user where they can add their family members and see their profile.
- We also provide risk calculation details to users as at what stage they are with disease.
- We also provide facility for users to interact with doctors in case if he/she have some personal problems.

### **PROJECT AIM :**

- Our Project mainly focuses on providing quick cure and medications to users after predicting their diseases.
- It might be helpful in rural areas where we see that many people are facing problems due to late and wrong treatment.
- Target the rural area where almost no Hospital/Doctor is available.
- Risk factor help users in getting treatment at right time.
